No disagreement. We will be meeting shortly to get our clinical priorities in order. It will be a busy year in that department, so I want to make sure we're doing the most important things first with limited resources. I'll keep you updated.

Hi Gary,

We were lucky that this was published at almost the same time as Scott's paper. We may not have warning of his next effort though. There is a very real possibility that he will do some sort of bacterial sampling study (the idea is obvious) and that the first we'll know of it is a published paper. If that happens, whatever Scott reports will be un-opposed for 1-2 years while we do a catch-up study, analysis, and get through the publication process. Waiting much longer seems like a dangerous strategy...

Regards, Dan.

Hi Folks,

Here is the published version of our article. Congratulations!

Happy Thanksgiving too!
